

DASHBOARD KPIs · DISTRESS FINDINGS · REGULATORY THRESHOLDS · RECOMMENDED ACTIONS

KEY FINDINGS

- M-Pesa has the highest distress score (1.64/10), driven by elevated fraud complaints and negative sentiment — despite being the market leader.
- April 2026 saw a 3x spike in complaints — Branch (7,596) and M-Pesa (4,145) led the surge. Likely triggered by a service outage or fee change.
- Regulated banks (Equity, KCB) reply to 100% of reviews. M-Pesa replies to 0.06% — a critical accountability gap for CBK attention.
- Tala and Branch score lowest on distress (0.53) despite high review volumes, suggesting better complaint resolution processes.
- 44% of reviews are under 15 characters (e.g. 'nice', 'bad'). Quality-filtered data paints a more accurate picture than raw counts.

FINANCIAL DISTRESS INDEX BY APP

SUGGESTED REGULATORY THRESHOLDS

Metric	Threshold	Action Required
Negative Review Rate	> 25%	Issue CRITICAL
Negative Review Rate	15–25%	Request WARNING
Fraud Complaint Count	> 200/month	Trigger CRITICAL

Distress Score	> 5.0	Mandatory CRITICAL
Distress Score	2.5–5.0	Enhanced WATCH
Company Reply Rate	< 20%	Require WARNING
Avg Star Rating	< 2.5	Initiate CRITICAL
Monthly Spike	> 2x avg	Immediate WATCH
Language Coverage	< 10% SW	Mandate INFO

RECOMMENDED ACTIONS FOR CBK

- 1 Mandate monthly distress score reporting from all mobile money operators.
- 2 Require M-Pesa to achieve minimum 20% consumer review reply rate within 90 days.
- 3 Adopt Pesa Salama dashboard as a real-time fintech consumer sentiment monitor.
- 4 Investigate April 2026 complaint spike — engage Branch & Safaricom for root cause.
- 5 Expand data collection to include Swahili & Sheng reviews for full market coverage.
